

Dissection Lab

8 Seats Available *RSVP TODAY*

FOR GRADES: 5-12
TIME & DATE: 1:00-2:00 PM Oct. 23, 30, Nov. 6, 13, 20
PLACE: Frontier Charter School's Eagle River Office

Suit up and get ready to explore the inner workings of plant and animal life! This unique, hands-on science course uses Inspired Learning dissection kits from Home Science Tools to develop an understanding of the world of plants, insects, water life, and mammals. Each student will become a biologist and follow guided instructions to dissect their specimen using an individual dissection kit. This session, we will be dissecting owl pellets, a starfish, a crayfish, a clam, and a perch. All materials are provided for use during this one-hour lab.

COURSE COST: \$40 for all five weeks. All materials included. For those not using student allotment funds for the course cost, payment by check only.

INSTRUCTOR: Frontier Academic Advisor Kristin Leahy shares the thrill of science exploration and enjoys inspiring children's learning.

HOW TO SIGN UP: Email Ms. Kristin at leahy_kristin@asdk12.org
